We are #TeamPTHR

Founded in 2012

WE ARE A CONNECTED,
COLLABORATIVE ENTERPRISE OF
CONSCIOUS BUSINESS ACTIVISTS,
WITH AUDACIOUS DREAMS OF
**Better business for a
better world.**

*Transforming teams and
the way they operate, to help
people flourish in their work.*

OUR MANIFESTO: **WE EXIST TO**

Help clients, partners and fellow positive activists transform, adapt and reinvent themselves through assisted systems of designing, facilitating, coaching, teaching and experimenting with us;

Know as much about the next stage in human, organisational and work evolution to help others learn and be enlightened about the ways to craft better lives through good work;

Bring together as many key players as we can in creating a coalition that builds a better future of work; and

Place more business imperatives towards the climate emergency and regenerative activities for our planet.

The 100 Most Influential People In HR

The PTHR Approach

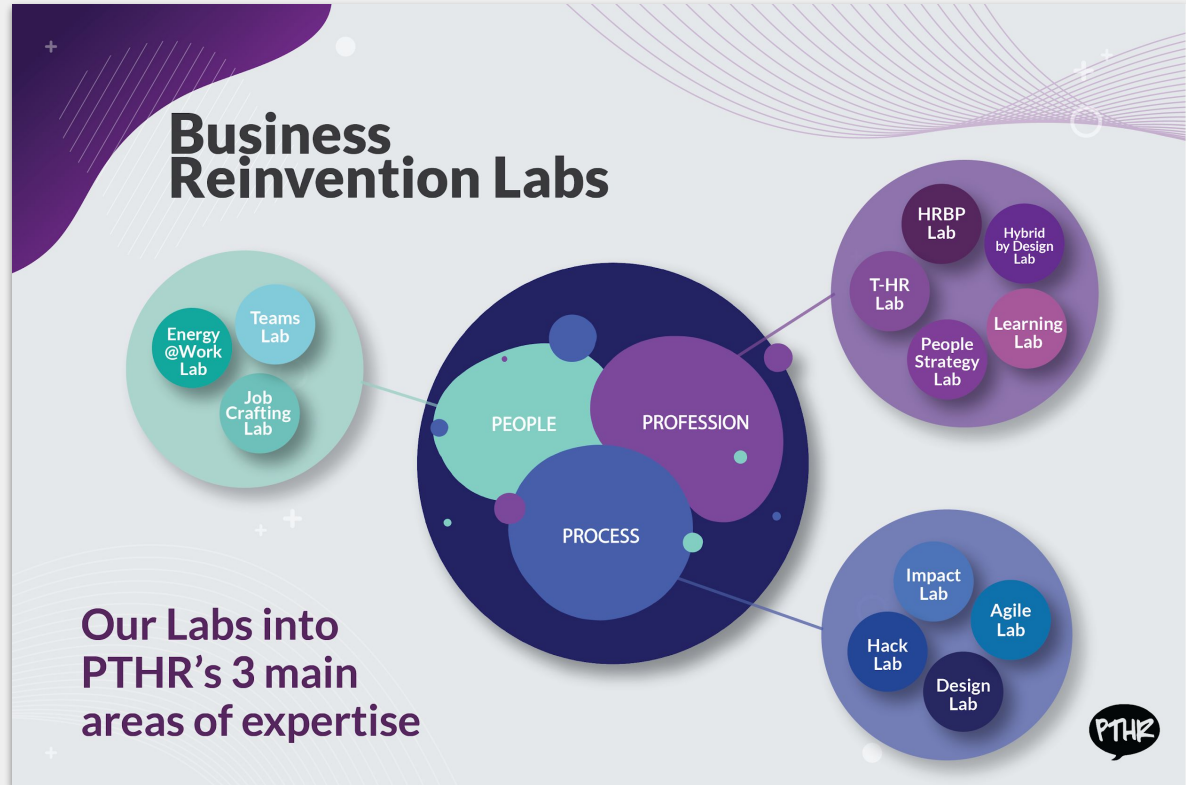

Immersive, online, award winning* *business simulator* environments, where we bring real work to teams with things to learn, problems to solve and solutions to invent.

Up to 3 hours facilitated Labs, that are highly participative and with pace. We believe we have found the antidote to *Zoom or MS Teams fatigue* with these highly engaging, creative, inclusive and productive Labs.

Contextualised, tailored and adapted - always.

**In November 2020 our Labs approach won an award at a Slovenian Management Conference.*

Our Awesome Clients

Hybrid work: WorkSpace is a red herring - focus on Belonging

4 May 2021 | Accountability, Belonging, Communication, Connection, Cooperation, Coronavirus, Culture, Dispersed teams, Diversity, Growth, Hybrid work, Interactions, Isolation, Leadership, Purpose, Remote Teams, Remote work, Standards

Photo: Dominik Vanyi on Unsplash

‘Going to work’ is no longer a destination, it’s a state of mind. Belonging creates our shared connection whatever space we’re in.

The Hybrid Workforce Network

PEOPLE & CULTURE
Who and How we do what we do

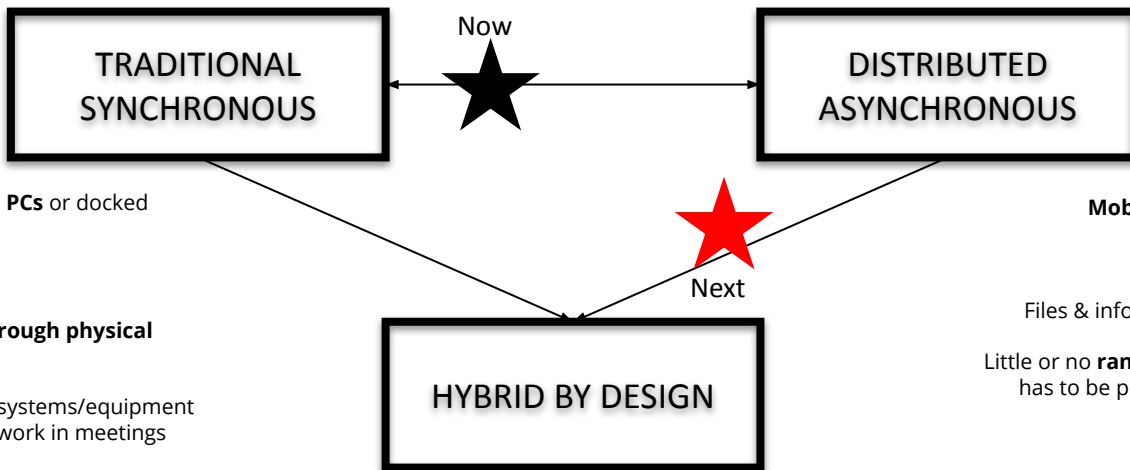

What works: experience

What works: exception

What works: experience

What works: research

Office-based **desks with cabled PCs** or docked laptops
Meetings on site **in rooms**
Learning at **desks or in rooms**
Interviews **in rooms**
Files & information **accessed through physical stores or online shared drives**

Structured, planned work using systems/equipment
Some unplanned, unstructured work in meetings rooms or by discussion
Social cohesion and relationship building work (e.g. appraisals; feedback; mentoring)

Mobile devices using secure connections
Meetings via **video/audio calls**
Learning **online**
Interviews **online**
Files & information **accessed via online shared drives**

Little or no **random, socially cohesive activities** all has to be planned for inclusion and participation

What we need

Workspaces **for occasional visits** to do largely unstructured work or remote working is unsuitable for individuals
Meetings **on site OR virtually** (avoid a mix)
Learning **in rooms and online**
Interviews **online** occasionally in rooms
Files & information **accessed via online shared drives**

Social cohesion and relationship building work (e.g. appraisals; feedback; mentoring)

Cynefin - Knowing where you *are*

Systems theory
Complexity theory
Network theory
Learning theories

There's agile and then there's Agile

NOT just being flexible or working remotely

NOT just having a more responsive mindset and strategies.

It is those **AND** work, project and development rituals, ceremonies and tools.

How to activate Agile and create the strategies and plans that will enable you to start applying and being more Agile in developing and delivering the work people do.

Agile approaches to work - can be delivered remotely, in a Hybrid scheme or in co-located ways.

Agile - 2001

The Agile Evolution of Work

Work is a combination of:

Productivity and Stratification

Efficiencies in process, resource utilisation, standardisation, and waste reduction/removal

AND

Categorized levels of human social systems and understanding of behavioural dynamics and motivational factors

The last 20 years have truly brought the predictability of production engineering to the sciences of variable human behaviours.

We previously tried to control all of these elements and realised that we are sometimes powerless in the face of external and internal influencing forces.

Agility and Agile are our way to adopt white-water kayaking rather than stem the swirling rages of the river.

Component: Purpose and values

Strategy

Leadership and culture

Planning, budgeting, and reviewing

Structure and accountabilities

From: "The Agile C-Suite," by Darrell Rigby et al., May-June 2020

Individuals and interactions, not processes and tools

- We set a clear ambition ("what" and "why") and metrics for success but delegate the "how" to the team.
- We empower teams and believe that the right answer lies not with us but within the team.

Customer engagement, not rigid contracts

- We encourage teams to seek feedback from a diverse set of customers and promote a culture of rapid adaptation to feedback.
- We believe that things can always be improved.

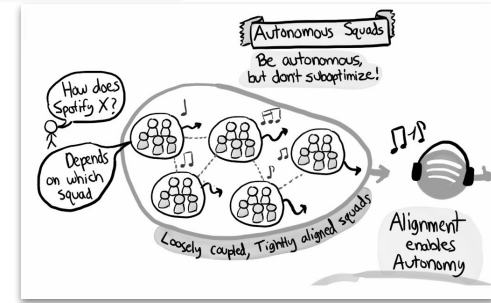

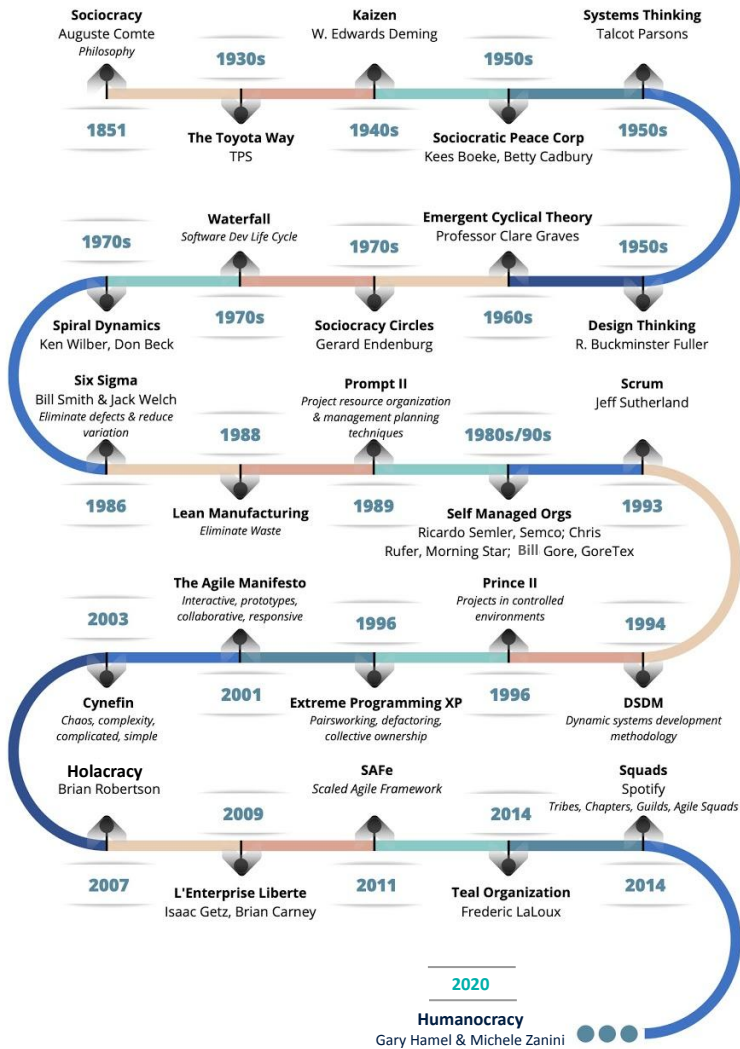

Working solutions, not excessive documentation

- We strive for "good enough" working solutions rather than demanding perfection.
- We protect teams so that they can focus; we rapidly unblock key impediments.
- We support teams in breaking down complex problems and frequently iterating in order to rapidly deliver solutions.

Flexibility, not concrete plans

- We celebrate learning and create a safe environment for teams to take prudent risks and test unconventional hypotheses.
- We embrace ruthless and constant prioritization and stop activities that are not yielding results within the defined time frame.

A short history of work systems

— — Hybrid Working - Fix the system, don't fix people

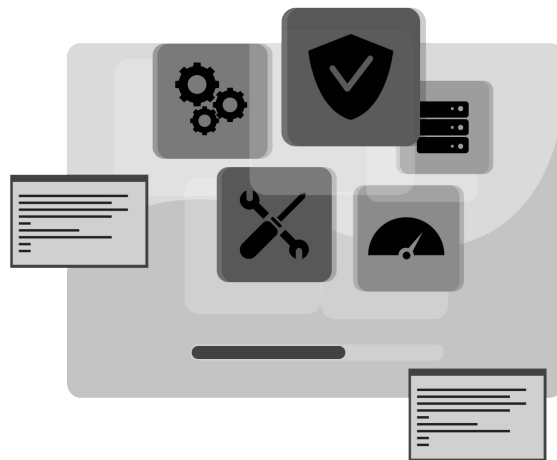

Key word = Principles

Adopt the principles of 'working out loud' so everyone can see who is doing what and how it is going (for some it is via a CRM/ERP workflow queue in other instances it is via MS Teams & Planner or Slack & Trello).

Agree on the principles of a complex, deep and thoughtful work (which is BETTER done in quiet spaces) and creative, socialised work (which needs people to be working in close proximity to each other).

Utilise the principles of Sprint-based approaches. Iterative development periods agreed by Teams that provide **work punctuations**. Reducing the monotonous hum of *never-finished* work.

Consider the principles of Show & Tells; Prototypes and iterations (so less reports about the work, and what the actual work looks like and is).

**Harvard
Business
Review**

Making the Case for Your Hybrid Plan

Knowing where you want to spend your time is all well and good, but it won't help if your boss isn't supportive of your hybrid work plan.

Luckily, all the data you've crunched about your productivity gives you a great place to start making the case. Summarize your findings in a concise note that shows the major responsibilities on your plate broken out into the parts that are best handled at the office, and the parts that are best handled at home. Support your conclusions with data that shows you write more words, reply to more emails, or create presentations more efficiently on the days that you are at home.

Depending on your manager, you may also find it helpful to estimate the specific amount of time each part of your work is likely to require.

For example, if your upcoming responsibilities include leading the work on that annual report, your hybrid plan might include the following:

Annual report (68 hrs)

Office tasks (24 hrs)

- Interview stakeholders (12 hrs)
- Brainstorm report messages (1 hr)
- Outline report (2 hrs)
- Review/troubleshoot report drafts (6 hrs)
- Brief and update designer (3 hrs)

Remote tasks (44 hrs)

- Background research for content (14 hrs)
- Draft report content (16 hrs)
- Image research for report design (4 hrs)
- Review/edit final report (10 hrs)

What Mix of WFH and Office Time Is Right for You?

by Robert C. Pozen and Alexandra Samuel

**digital
northampton**

Dispersed working in a Hybrid Team

Work that is either high in volume and repetition; OR
Work that is lower in volume but is complex and challenging:

Start by knowing where **the work sits** (chaotic, complex, complicated, simple)

If low-cognitive, high-volume - *business as usual simple*

- use the pomodoro technique where possible - 25 minutes applied/short breaks
- bring variety and a sense of achievement/accomplishment not just numbers
- Use journaling techniques - what were the nature of the queries? Any approaches that worked with extra positive impact? If people were aggravated, what was that about? Are there other processes before or after this query resolution that could be improved or enhanced?

If challenging work - *project work (complex and/or complicated)*

- break into Agile sprint-based cycles (visible work backlogs; sense of accomplishment; adaptive planning)
- similarly - use journalling - what was similar and different about each challenging aspect of the project/work?
- how did I optimise my work? How did I know what others were working on that chimed well with my efforts? How did we resolve issues and decisions? What would we do differently next time?

Remote work features less natural breaks or random distractions - there is a need to **create punctuation** else the day is perhaps a less-fulfilling “*monotonous hum.*”

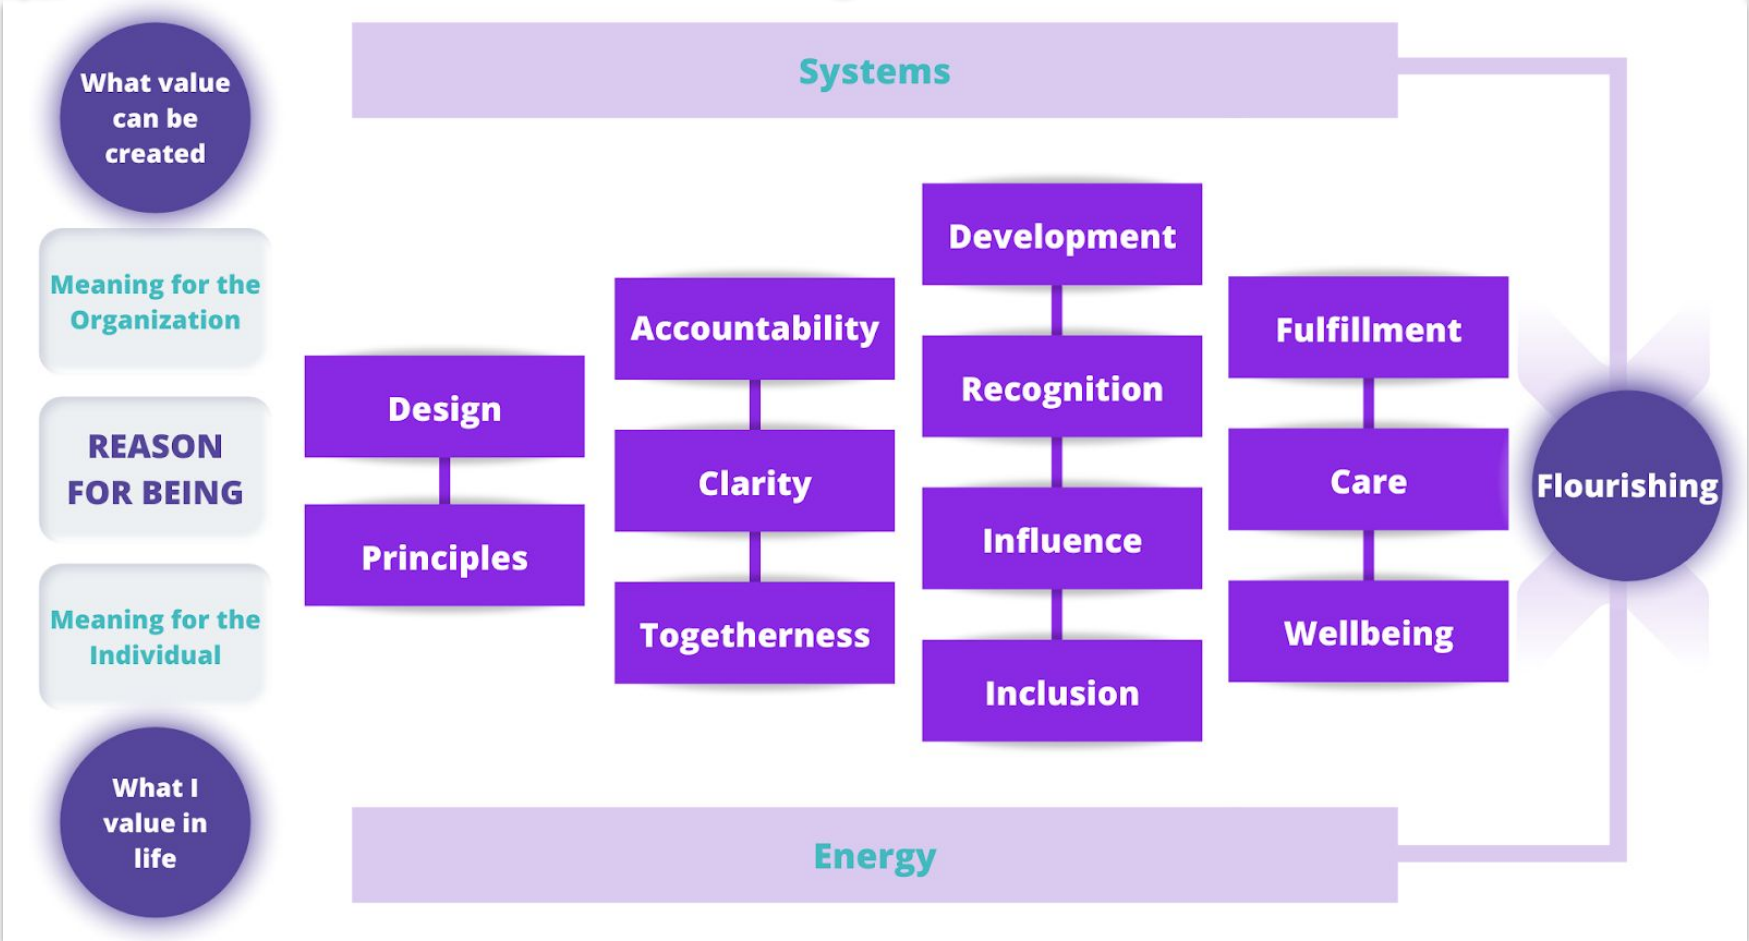

Learning your way into Hybrid Working

Key word = Enough

- Learn **enough** so you can start experimenting with fresh patterns and approaches
- Choose work areas/topics that are **enough** to validate place-based or remote working principles across the team
- Share **enough** so the learning is from the multiple perspectives of others about Hybrid working
 - how does Hybrid working feel to me?
 - what does Hybrid working do to how I approach my work?
- Share with **other teams** you're closely associated with, and look at how your Hybrid plans and theirs match/differ and work out if this might impair or enhance each other's work.
